GAME DEVELOPMENT FOR KIDS

USING SCRATCH PROGRAMMING

GAME DEVELOPMENT FOR KIDS

Have you ever thought, instead of just playing games, how it is developed or do you wish to develop your own game?

This course is intended for those who are new to programming or you want to see if programming is for you. This course emphasizes learning the basics of programming while developing games using Scratch, a visual programming platform.

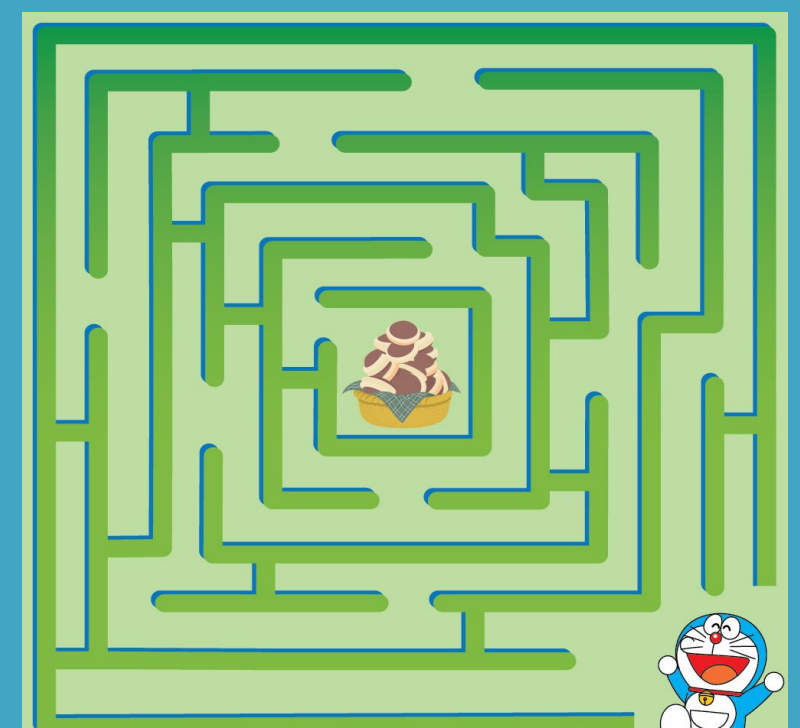

This course will introduce to you coding in the fun and easiest way. Scratch uses visual blocks like puzzle pieces. So, instead of typing the code, you have to just drag and drop so it is the easiest way to learn coding and this process will be fun as you are developing your own game!!

COURSE CONTENT

- What is scratch?
 - Introduction to scratch platform
- Block Sequencing
- what is the use of block?
- how to use it ?
